

Ford GT "PB2-1"

- Color: Blue with White Stripes
- Odometer: 47,524 (as of 8/21/2008)
- Options: Forged BBS Wheels, McIntosh Stereo, Red Calipers
- First car in the PB2 pre production build (last pre-production build before production)
- Vehicle's owner was Manufacturing and was used for mileage accumulation, manufacturing, and electrical prove-out
- After the vehicle successfully completed it's testing it was transferred to Product Development (SVT)
- For the brief amount of time that a MkII follow on program was in the planning stages, it was used as the program vehicle
- Vehicle has a prototype small pulley for increased supercharger boost (this pulley eventually became the Ford Racing pulley)
- Vehicle has exhaust manifold heat shields printed with "Mark II" visible when the clamshell is opened
- "Ford GT" logo fuel filler cap
